

Here at CALWEST TROPICAL, INC. we started just like you... Growing orchids in the kitchen window. We too had a difficult time finding quality products at a reasonable price. Through this, CALWEST TROPICAL, INC. was born. Over the years we have made many contacts with manufacturers around the world, and have become direct distributors for most of our products. We import our products by the full cargo container, thus enabling us to sell quality products to both the beginner and the commercial grower at very competitive prices. We also have wholesale and quantity discount pricing. Feel free to contact our knowledgeable staff or visit us on the web at:

PH and TDS Meters

PH levels being too high or too low may drastically affect the nutrient availability to plants and/or orchids. What is PH? Acid and basic are two extremes of chemicals, and a substance that is neither acidic or basic is neutral, the PH scale runs from acidic being 0 or basic being 16 and neutral being 7. Most orchid's optimal PH level is between 5.5 and 7.2, this PH level is after you have added fertilizer and other additives such as Seaweed Extract or Superthive. PH levels being too high or too low can be one of the major causes for plants and/or orchids not blooming and keeping within this range is critical to their overall health. TDS (Total Dissolved Solids): This refers to the amount of dissolved solids in your water such as various compounds of salts, minerals and metals. Checking your TDS levels regularly lets you know the quality of water, and if they are high then you might want to consider a filtration system. If you currently use a filtration systems checking your TDS levels regularly will let you know when it is time to change the filters, or alert you that something might be wrong. Also, when using a filtration system you need to be aware that micronutrients will need to be added along with your fertilizer. EC (Electric Conductivity): This is a good indicator of nutrient concentration of your fertilizer mixes and just another way to determine your TDS levels through conductivity.

PH10

The Checker 1 provides growers with fast and accurate PH readings. The Checker 1 is easy to calibrate, uses a replaceable PH electrode and works for 3000 hrs. before you have to change batteries. This meter accompanies the EC1 for all your testing needs.

Item #	PH Meter	Price	Weight
PH10	Economical PH Tester	\$ 31.20	1 lb.

PH2

This waterproof PH/temperature tester includes features such as a dual-level LCD, battery level indicator replaceable PH electrode cartridge, temperature in C or F, stability indicator, automatic shut-off and automatic calibration all in a floating waterproof casing. This meter also perfectly accompanies EC1.

Item #	PH Meter	Price	Weight
PH2	Waterproof PH and Temperature Tester	\$ 77.10	1 lb.

PH3

The new combo waterproof tester offers high accuracy PH, EC/TDS and temperature measurements in C or F all in a single tester! PH and EC/TDS readings are automatically compensated for the effects of temperature (ATC). These technologically advanced testers have a replaceable PH electrode cartridge with an extendable cloth junction as well as an EC/TDS graphite electrode that resists contamination by salts and other substances.

Item #	PH Meter	Price	Weight
PH3	Waterproof PH/EC/TDS Meter	\$ 144.15	1 lb.

PH4

These multi-parameter instruments test 4 of the most important factors in the growing environment. This tester is a rugged all around waterproof meter for easy PH/EC/TDS measurements. Accuracy is ensured with ATC and an advance sensor, which completely eliminates polarization and oxidation problems. Comes complete with probe, battery, calibration, cleaning and Cal-Check solutions. This tester is a PH/ED/TDS meter designed for simplicity of use in taking PH, mS/M, and ppm measurements. Suited for hydroponics, greenhouses, farming and ground water applications.

Item #	PH Meter	Price	Weight
PH4	Professional Waterproof PH/EC/TDS Tester	\$ 172.00	2 lbs.

EC1

This tester is equipped with such features as a replaceable graphite electrode, adjustable TDS ratio, temperature C or F, automatic temperature compensation (ATC) with adjustable indicator, automatic shut-off, and automatic calibration all in a floating waterproof casing. These 3 in 1 testers are unmatched in EC/TDS temperature measurements. This meter accompanies perfectly the PH10 or PH2.
